

BiInnovate Africa in Ethiopia (2016-2021)

Innovation partnerships between academia, industry, and government institutions in Ethiopia are delivering several products at different stages of development and commercialisation. These products are eco-friendly, and are part of BiInnovate Africa's contribution to economic growth and social development in eastern Africa through sustainable industrialisation.

Public Sector Organisations: Hawassa University, Addis Ababa University, Ethiopia Institute of Agricultural Research (EIAR), Ethiopian Biotechnology Institute (EBTI), Wondo Genet College of Forestry and Natural Resources, Debre Berhan University Business Incubator, Debre Berhan University.

Private Sector Company: Soil and More.

Developing diagnostic tools to address COVID-19

Using earthworms to decompose coffee waste and the excess as feed for fish and poultry

Chicken and fish feed enriched with insect-based proteins

Small-scale community-based biorefineries to produce syrups and other products from sorghum stems

New integrated methods for industrial wastewater treatment

Nutritionally enhanced sorghum and millet products

Using vitamin A enriched sweet potato puree to produce fried and bakery products

Developing an innovation-led bioeconomy strategy for eastern Africa

Two (2) BiInnovate Africa Postgraduate students in Ethiopian universities

Five (5) BiInnovate Africa women fellows from Ethiopia (2018-2021)
